

Swimsol

Job Description
Solar Engineer (m/w/d)

As market leader in the area of solar energy in the Maldives and only company worldwide that commercially offers marine floating solar platforms, we are constantly growing our experiences and success stories – and now also our team! Currently, we are looking for a skilled

Solar Engineer

at our headquarter in Vienna.

Your new job:

- As integral part of our core business, you'll design, procure, install and manage the operation of our photovoltaic power systems
- You're taking over when the sales team closes a project contract, and start the planning and designing with PV*Sol, AutoCAD, sometimes Solidworks and our own proven tools
- A couple of times per year you'll travel to our project sites in tropical island regions to manage and take part in the installation of solar systems (3-6 weeks per visit usually)
- At the site, you're part of an enthusiastic and experienced project engineering team
- You'll support and manage the procurement and logistics of the components
- A comprehensive technical documentation concludes the installation process
- If required, you'll support the monitoring and maintenance of the solar assets operated by Swimsol

This is you:

- A skilled person with a completed technical education (HTL, TU, FH or equivalent)
- Ideally you have some work experience e.g. in (building) construction, plant engineering, energy or environmental engineering or implementation of solar systems
- Knowledge or experience with electrical engineering would be beneficial
- You are fluent in English and German
- Competent use of MS Office and other software like AutoCAD, PV*Sol, Eplan, or similar
- You are structured, reliable and highly adaptive to new situations and challenges
- You enjoy physical work, and are not afraid to get your hands dirty
- You love to travel (especially to hot climates) and are eager to implement your projects on-site

What we offer:

- Being part of a very motivated and growing team in a very unique company
- Diverse and exciting tasks in an international environment
- The opportunity to travel to and work on tropical islands (e.g. the Maldives)
- Work-life friendly employment, flexible working time
- A relaxed working atmosphere
- Fulltime-salary starting at EUR 2.500 gross per month for junior engineers with little experience, higher salaries as appropriate for skills and experience

If you're interested, please send your CV, cover letter (English or German) and the Self-Assessment sheet available on our [website](#) to jobs@swimsol.com.
