

Swimsol

Job Description Solar Electrician / Electrical Engineer

© 2025 Swimsol Maldives Pvt. Ltd

H. Azum, 2nd Floor, Ameenee Magu, Male'
Tel. +960 9990850 – jobs@swimsol.com

What we do

Swimsol developed the world's first floating solar system for a marine environment. It provides clean solar energy for tropical island states like the Maldives where onshore space is scarce.

Our main work is:

- Installation of Solar PV systems on roofs and at sea
- Maintenance of moorings systems and troubleshooting of operational PV systems
- Transport, storage, and maintenance of solar system components and tools

What does working with Swimsol mean?

- Becoming part of a dynamic, international team
- Gaining opportunities to learn and develop in diverse areas including solar system construction, marine installations, electrical engineering, installation site management, and customer relations
- Traveling across the Maldives and occasionally abroad

What this job includes and we expect from you

- Mounting, maintenance and repair works of electrical components
- Working according to wiring- and single line diagrams
- Electrical wiring of electrical components of the photovoltaic system (photovoltaic modules, inverters etc.) on DC and AC side
- Connecting the solar system to the clients' grid (AC side)
- Implementing and commissioning of the installed system and its components
- Reference person for technical questions for colleagues and clients

Our offer

- Being part of an extremely motivated team in a unique company
- Diverse and exciting tasks in an international environment
- Full-time employment, for 48 hours per week
- Negotiable salary based on qualifications and experience.
- Food and Accommodation will be provided while being away from home base.
- Holidays and other provisions of the Labour Law will be followed

Application Requirements

- Up-to-date resumé
- Clear copy of National ID card, front and back
- Educational certificates
- Police clearance
- Recent passport-size photo
